

KIMTECH PURE* G5

STERLING* Nitrile Gloves

The STERLING* Glove Technology combines the protection of nitrile with the sensitivity of latex. Our manufacturing process boosts the glove's tensile strength (the force required to break through the glove) to increase its already superior barrier protection. The process also allows a reduction in glove thickness, so less force is required to stretch the material.

The result is a latex-free glove with the dexterity and sensitivity of latex that offers superior glove strength versus competitive gloves.

Product Specifications:

- Synthetic Nitrile Polymer (Acrylonitrile Butadiene) Containing No Natural Rubber Latex
- Silicone-free
